MARMITEK[®]

Invisible Control

INVISIBLE CONTROL

- Operate the audio/video equipment in a closed multi media cabinet with your own remote control.
- It works with all A/V equipment (DVD/SAT/VIDEO/AUDIO etc.) with an infrared eye (except B&O).
- Connect and operate multiple appliances (standard 2, maximum 4), with the cabinet doors shut or appliances out of sight.
- Works on a 9V battery (not included) or from a mains supply (adapter included).
- Place the Invisible Control on, under or next to the multi media cabinet, in view of the remote control.

HOW DOES IT WORK?

With the Invisible Control you can control your A/V equipment if it is placed in a closed cupboard or if your equipment is out of view. Connect the cable with IR LEDs to the side of the Invisible Control. Connect the power adapter included or insert a 9V battery (not included) in the battery compartment. Stick the IR LED's on the IR eyelets of your A/V equipment. Place the Invisible Control on top of, below or next to the A/V unit, within sight of your remote control.

TECHNICAL INFORMATION

- Power: 12V/200 mA adapter (included) or a 9V battery (battery not included)
- Connections: 2 connections for the IR Eye Cable (1 IR Eye Cable included)
- IR Eye cable: 2 IR LEDs (blinking), cable length: 3 m with 3,5 mm jackplug
- Dimensions: 90x75x30 mm

IR EYE (UNIVERSAL IR EXTENSION CABLE)

The IR Eye is a universal IR extension cable with 2 IR LEDs. With this you can control up to 2 appliances with Invisible Control. Also suitable for use with audio/video transmitters and IR extenders (Invisible Control, Powermid) by e.g. Marmitek, Speakercraft.
